Pre-Programming: Everything you need to know before you code
Angular – The Complete Guide (2023 Edition)
Digital : Angular 2 Routes and Forms_FP
Digital : Angular5
Digital : Bootstrap

PROFILE

I'm a skilled Front-End Developer with a strong focus on Angular, HTML, CSS, and other related technologies. With a keen eye for detail, I take pride in crafting visually stunning and intuitive web applications that deliver a seamless user experience. My ability to create clean, scalable code and stay current with the latest development trends enables me to develop robust and maintainable web applications. I thrive in collaborative team environments. Overall, I'm a dedicated and motivated Front-End Developer with expertise in Angular, HTML, CSS, and related technologies.

EXPERIENCE

TCS

2022–2023

ANGULAR FE DEVELOPER TRAINEE

Attended Angular Front-end Development course and learned HTML, CSS, TypeScript, Angular Framework, and RxJs Operators and API Calls. Working on advanced angular ideas like NgRx State Management.

PROJECTS

Foot Shop – Footware Shopping app

Foot Shop is a demo app designed to provide a seamless shopping experience for footwear enthusiasts. It features a user-friendly interface and employs UX design techniques to enhance user engagement. It allows users to browse through various categories of shoes and filter results by different available options. It also features an intuitive checkout process to ensure a hassle-free experience. Overall, Foot Shop provides a convenient and enjoyable shopping experience for anyone in need of a new pair of shoes.

Delta.com – Website Lookalike for Booking Page

The delta.com website prototype is designed to emulate the original website's interface and functionality, with a responsive design and interactive elements. It incorporates modern front-end technologies such as Angular, HTML, CSS, and JavaScript to provide a seamless user experience. The prototype is a testament to the author's expertise in front-end development and ability to create high-quality, professional-grade applications.

Developed Multitude of Engaging Websites

My experience in creating multiple front-end projects using Angular, Bootstrap, CSS, and HTML demonstrates my expertise in creating, engaging and responsive user interfaces. I leverage my knowledge of front-end technologies to design visually appealing and intuitive websites.
